

3/18/65

PROPOSED CHANGE TO CODIB-D-75/1, 1 MARCH 1965

The National Security Agency proposes the following amendment to the staff study of 10 November 1964 attached to CODIB-D-75/1, 1 March 1965, to be inserted after page 1, paragraph 4 thereof:

"NSA's participation would be limited to utilization of no-cost space in the Suitland Federal Records Center within the area allocated to the intelligence community for maintenance of approximately 50,000 cubic feet of inactive technical records to be selected by NSA; such space to be physically partitioned from all other records, to have a separate security alarm system, and with access and servicing limited to NSA personnel."

CODIB-D-75/1
1 March 1965

UNITED STATES INTELLIGENCE BOARD
COMMITTEE ON DOCUMENTATION

Proposal for Central Storage Facilities for
Inactive USIB Community Agency Records

1. CODIB-D-75 of 30 January 1961 reflected agreement among the Records Management Officers of the Departments of the Air Force, Army, Navy, State, the Atomic Energy Commission, the Federal Bureau of Investigation and the Central Intelligence Agency to ease records management handling problems involving inactive materials older than five years.
2. The Chief of CIA's Records Management Staff has sent the attached memorandum and study to reflect further efforts to control the volume and processing of retired USIB community records.
3. It is suggested that the attached be discussed at a forthcoming meeting.

MEMORANDUM

TO : Chairman, Committee on Documentation **DATE: 18 Jan 1965**
FROM : CIA Records Administration Staff/DD/S
SUBJECT: Central Storage Facilities for Records of USIB Community Agencies

1. The attached Staff study describes a proposal that can contribute to the control of volume as well as content and scope of USIB community records.

2. The paper proposes intelligence community use of space in the new Federal Records Center to be built at Suitland, Maryland which will be completed by February 1967. The proposal has been concurred in by the Records Management Officers of DIA, State Department and CIA and approved in principle by AEC.

3. The National Security Agency plans to store records in the Suitland Center in the area assigned to the intelligence community, but this space will be separated from all other records, have its own physical security controls and access will be restricted to NSA personnel. The NSA representative feels that due to the nature of the end products of his Agency "... it is not feasible to participate in all aspects of the USIB Records Center."

4. To date, no comment on this proposal has been received from the Federal Bureau of Investigation.

5. This paper is being submitted to CODIB for their information and comment.

MEMORANDUM

TO : CIA Records Administration Officer

DATE: 10 November 1964

FROM : [] Records Analyst

SUBJECT: USIB Records Center

OBJECTIVE

To establish a central records facility in the new Federal Records Center at Suitland, Maryland for storing inactive intelligence products and related documents of concerned USIB Community Agencies.

ASSUMPTIONS

1. That the physical security of the facility will be approved by the Agencies concerned.
2. That staffing and personnel security requirements will be approved by the participating agencies.

Facts

1. Agencies of the USIB Community have agreed in principle with the provisions of CODIB-D-75, 30 January 1961, concerning interagency use of record copies of intelligence products. It was the intention of this agreement to control growth of reference collections by destroying inactive material received from other Agencies, and to rely on the Agency of record for future reference needs.
2. Within the USIB Community copies of intelligence products are held in scattered locations such as offices, libraries, agency records centers, the Federal Records Center and the National Archives.
3. Reference service to scattered collections is often cumbersome and time consuming.
4. Some persons responsible for administering and servicing reference collections are reluctant to destroy another agency's material because they doubt that agency can produce needed records. The same persons are critical of the time involved in getting reference service.

FOR OFFICIAL USE ONLY

- 2 -

5. The concerned Records Officers of the USIB Community agree that a centralized records storage facility should be established in the new Federal Records Center at Suitland, Maryland. Officials of the National Archives and Records Service have provided for the space and physical security arrangements required by these agencies.

Discussion

1. The Federal Government has established a precedent for the utility of specialized records facilities. The National Archives and Records Service, GSA, built and operates the Civilian Personnel and the Military Personnel Records Centers in St. Louis, Missouri. These centers presently store and service more than 2,500,000 cubic feet of records.

2. The Federal Records Center in Alexandria, Virginia now stores and services more than 50,000 cubic feet of intelligence records of the Defense Intelligence Agency (which includes ONI, ACSI and AFCIN) and the Department of State. These records could serve as a nucleus for the proposed USIB Center.

3. To increase the effectiveness of the program envisioned in CODIB-D-75, the custodians of intelligence reference collections need more assurance that other agency products will be available when needed and within the shortest time possible. A central records facility for the USIB Community would store record copies and/or distribution copies of intelligence products and related records of all concerned agencies. A principal mission of this facility would be to secure and maintain on a continuing basis complete sets of intelligence products and thus supply the needed assurance of availability. Also, a central records facility would expedite reference service since there would be only one point of call, and courier service could be provided on a priority or a routine basis. Priority delivery could be made within an hour or two and the routine within a working day.

Conclusion

1. The control of growth as well as content of intelligence reference collections within the USIB Community is a continuing problem recently alluded to in the Stage 1 Report of the Staff for the Community Information Processing Study (SCIPS). That report estimated that ". . . there are 220 million unit records in the central reference files of the Community . . . and that the present new growth of these files is at the rate of 30 million unit records per year . . ." A central records facility for the USIB Community could contribute to the control of this growth by storing and servicing the intelligence products

of the Community and thus permit destruction of inactive copies held in various reference collections. The Community would also benefit in terms of content control by knowing what records would be available. Also, the Community could be assured of preservation of their intelligence archives.

2. The actions proposed in this paper relate to the mission of the Committee on Documentation, USIB (CODIB) in respect to promoting optional use of information of intelligence value, and in respect to their responsibility for monitoring interagency agreements concerning such matters.

Action Recommended

1. That the Records Officers concerned formally concur in the objective of this paper as stated above.

2. That this proposed be coordinated with CODIB for the purpose of informing the USIB Community.

STAT 

Reference is made to the proposal for the establishment of a central records facility for storing inactive intelligence files of USIB Community Agencies.

The AEC is in agreement with the objectives of the proposal; however, our volume of inactive intelligence records is comparatively small and economically maintained. The manpower and other costs attendant to their preparation for retirement to a central storage facility would be disproportionate to any advantage that the AEC might gain. Under these circumstances, we plan to retain our small collection of inactive intelligence data.

As outlined in my letter to you on April 28, 1960, the AEC retains select intelligence documents originated by other agencies to minimize our need for requesting reference service. We feel the minimal cost of storing and maintaining this small volume of duplicated records is far outweighed by in-house capability to provide ready access. We will continue to provide other agencies reference service to inactive AEC originated documents as requested and available.

Sincerely yours,

s/ Thomas J. Pugliese
